Panyun (潘雲) is a remote village located in Guangxi, about 150km away from Guilin. The original primary school at Panyun was dilapidated and subsequently after a heavy storm. Students of the school had to travel long distance to other school for lessons.

Panyun Primary School Re-construction project is a charitable project of the Department of Building and Real Estate. Initiated by Dr. Nicolas Yeung, Chairman of CII and generous funding from the Rotary Club Kowloon to finance the design and construction cost, the Department set up a task comprising academic staff and students from the B.Sc. (Hons) Building Engineering and Management programme to prepare the design of the school building and associated project management and contract administration tasks. Members of the task forces have visited the village six times from October 2005 to April 2007 to have meetings with local officials, representatives from the village and to monitor the progress and quality of construction work. The construction was completed in March 2007 and the grand opening was held on 7th April 2007.
A photographic chronicle for the Panyun Primary School Re-construction Project

Panyun Village
