

Ibrahim Deserving Best Presentation Award in the WABER Conference

Taking on a new challenge, Mr. Ibrahim Yahaya Wuni, our PhD student, delivered a presentation on 'Making a Case for Modular Integrated Construction in West Africa: Rethinking Housing Supply in Ghana' in the 10th West Africa Built Environment Research (WABER) Conference 2019 in Accra, Ghana in early August. Under the supervision of Prof. Geoffrey Shen, Ibrahim made a lot of efforts on this paper. His outstanding performance deserved the Best Presentation Award in this Conference.

As the most reputable and highly-recognized conference in West Africa, the WABER Conference aims to offer a platform to young built environment researchers in the region to sharpen their research skills and knowledge.

Ibrahim, Keep up the good work!
